GENERAL CONSENT REGARDING MEDICATION

If I choose to work with Dennis Cozzens M.D or Harold Erik Ramsey, PMHNP and take medications prescribed, I understand and agree with the following:

The use of medication is intended to cause a favorable change in my mood or body. Medications may cause, not only the intended favorable effect, but also additional effects, which are called side effects. Although sometimes favorable, side effects are usually unfavorable. Most medication side effects are reversible (i.e. stopping the medication will stop the side effect) and cause no lasting damage. Some medication side effects are irreversible and do cause lasting damage. The use of any medication involves risk. The office will provide information about all medications prescribed and the possible side effects, known dangers, assessment of potential benefits weighed against potential risks and treatment options.

This general consent is intended to cover any medication or combination of medications Prescribed and taken by my child or I.
